Subject Index of Volume 143

Additives
effects of additives on wear mode and morphology of wear debris generated in the lubricated sliding of steel, 119
Alloys
anisotropic wear of planar-random metal matrix composites with zinc alloy matrix, 149
corrosive wear behaviour of Cr–Mn–Cu white cast irons in sand–water slurry media, 203
effects of material and processing conditions upon ring calibration curves, 71
laser surface cladding of stellite and stellite–SiC composite deposits for enhanced hardness and wear, 353
Aluminium
anisotropic wear of planar-random metal matrix composites with zinc alloy matrix, 149
characterization of cylindrical holes in metallic substrates via their infrared emission patterns, 255
effects of material and processing conditions upon ring calibration curves, 71

Bearings
theoretical and experimental investigations on the pitch and width of corrugations on the surfaces of ball bearings, 1
Brake shoes
analysis of wear behaviour of brake shoes in trains, 197

Carbon coatings
friction characteristics and wear resistance of carbon-coated glass-based rigid magnetic disks, 241
Ceramics
unlubricated wear and friction of toughened zirconia ceramics at elevated temperatures, 277
Corrosion resistance
corrosive wear behaviour of Cr–Mn–Cu white cast irons in sand–water slurry media, 203
Corrugations
theoretical and experimental investigations on the pitch and width of corrugations on the surfaces of ball bearings, 1
Cutting tool
a three-zone model and solution of shear angle in orthogonal machining, 29

Elastohydrodynamic lubrication
a new non-newtonian fluid model for elastohydrodynamic lubrication of rectangular contacts, 297
Electrical currents
theoretical and experimental investigations on the pitch and width of corrugations on the surfaces of ball bearings, 1
Electrodischarge machining
surface modification in electrodischarge processing with a powder compact tool electrode, 45

Fretting
effect of water vapor in air on fretting wear of pure metals, 15
Friction
friction characteristics and wear resistance of carbon-coated glass-based rigid magnetic disks, 241
influence of forced vibrations on the static coefficient of friction — numerical modeling, 175
planar sliding with dry friction. Part 1. Limit surface and moment function, 307
planar sliding with dry friction. Part 2. Dynamics of motion, 331
unlubricated wear and friction of toughened zirconia ceramics at elevated temperatures, 277

Elsevier Sequoia/Printed in The Netherlands

Hardness
laser surface cladding of stellite and stellite–SiC composite deposits for enhanced hardness and wear, 353
Heat flows
analytical calculations of the temperature field and heat flows on the tool surface in metal cutting due to sliding friction, 379

Impact velocity
effect of impact velocity on slurry erosion and a new design of a slurry erosion tester, 231
IR emission
characterization of cylindrical holes in metallic substrates via their infrared emission patterns, 255
Iron
corrosive wear behaviour of Cr–Mn–Cu white cast irons in sand–water slurry media, 203

Limit surface
planar sliding with dry friction. Part 1. Limit surface and moment function, 307
Lubrication
a new non-newtonian fluid model for elastohydrodynamic lubrication of rectangular contacts, 297
a study on the limit criterion of full and partial lubrication, 221
effects of additives on wear mode and morphology of wear debris generated in the lubricated sliding of steel, 119
influence of surface topography on low-speed asperity lubrication breakdown and scuffing, 137

Magnetic disk
friction characteristics and wear resistance of carbon-coated glass-based rigid magnetic disks, 241
Microstructures
sliding wear behavior of pearlitic structures in eutectoid steel, 57
Moment function
planar sliding with dry friction. Part 1. Limit surface and moment function, 307
Motion
planar sliding with dry friction. Part 2. Dynamics of motion, 331

Plastic deformation
influence of surface topography on low-speed asperity lubrication breakdown and scuffing, 137
Polytetrafluoroethylene
effect of fluorinated ethylene propylene copolymer on the wear behaviour of polytetrafluoroethylene, 87

Residual stress
residual stress analysis of three-body abrasion, 365
Reverse-flow
a thermohydrodynamic solution of the two-lobe bearing considering reverse-flow at the leading and trailing edges, 159
Ring calibration
effects of material and processing conditions upon ring calibration curves, 71

Scuffing
influence of surface topography on low-speed asperity lubrication breakdown and scuffing, 137
the influence of surface roughness texture on the temperature and scuffing in sliding contact, 99
Shear angle
a three-zone model and solution of shear angle in orthogonal machining, 29
Sliding
planar sliding with dry friction. Part 1. Limit surface and moment function, 307
planar sliding with dry friction. Part 2. Dynamics of motion, 331
Sliding friction
analytic calculations of the temperature field and heat flows on the tool surface in metal cutting due to sliding friction, 379
Sliding speed
a new non-newtonian fluid model for elastohydrodynamic lubrication of rectangular contacts, 297
Sliding wear
sliding wear behavior of pearlitic structures in eutectoid steel, 57
Slurry erosion
effect of impact velocity on slurry erosion and a new design of a slurry erosion tester, 231

Steel
characterization of cylindrical holes in metallic substrates via their infrared emission patterns, 255
effects of additives on wear mode and morphology of wear debris generated in the lubricated sliding of steel, 119
on the tool-life equation of TiN-coated high speed steel tools, 267
residual stress analysis of three-body abrasion, 365
sliding wear behavior of pearlitic structures in eutectoid steel, 57
Stellite
laser surface cladding of stellite and stellite–SiC composite deposits for enhanced hardness and wear, 353
Surface modification
surface modification in electrodischarge processing with a powder compact tool electrode, 45
Surface roughness
the influence of surface roughness texture on the temperature and scuffing in sliding contact, 99
Surface topography
influence of surface topography on low-speed asperity lubrication breakdown and scuffing, 137

Temperature field
analytic calculations of the temperature field and heat flows on the tool surface in metal cutting due to sliding friction, 379
Thermohydrodynamic solutions
a thermohydrodynamic solution of the two-lobe bearing considering reverse-flow at the leading and trailing edges, 159
Three-body abrasion
residual stress analysis of three-body abrasion, 365
TiN-coatings
on the tool-life equation of TiN-coated high speed steel tools, 267
Titanium
effects of material and processing conditions upon ring calibration curves, 71
Tool-life
on the tool-life equation of TiN-coated high speed steel tools, 267

Vibrations
influence of forced vibrations on the static coefficient of friction — numerical modeling, 175

Wear
anisotropic wear of planar-random metal matrix composites with zinc alloy matrix, 149
effect of fluorinated ethylene propylene copolymer on the wear behaviour of polytetrafluoroethylene, 87
effect of water vapor in air on fretting wear of pure metals, 15
effects of additives of wear mode and morphology of wear debris generated in the lubricated sliding of steel, 119
laser surface cladding of stellite and stellite–SiC composite deposits for enhanced hardness and wear, 353
analysis of wear behaviour of brake shoes in trains, 197
unlubricated wear and friction of toughened zirconia ceramics at elevated temperatures, 277

Zinc
anisotropic wear of planar-random metal matrix composites with zinc alloy matrix, 149
Zirconia
unlubricated wear and friction of toughened zirconia ceramics at elevated temperatures, 277
